

# PALAU

## November 2025

Palau is considered one of the world's premier dive destinations, with dozens of dive sites in a rare variety: walls with fascinating coral formations, reef corners where the currents attract sharks, rays and schooling fish, channels and other sandy bottom sites, tunnels, holes, caves and caverns, and plenty of WWII freighter and plane wrecks! From macro to mantas, Palau has it all!

**SAM'S TOURS**  
PALAU

Most dive sites are located about 45 minutes from Sam's Tours, offering our guests picture-perfect scenic boat rides through the mushroom-like Rock Islands. Surface intervals and lunch breaks are normally spent on either a virgin white sand beach with wild green vegetation, equipped

with cozy seating benches and toilet facilities, or on top of snorkeling sites with stunning shallow reef plateaus.

Although Palau is considered an advanced dive destination due to frequent currents and depths, there are plenty of easy dive sites for beginners, or for those who wish to become a diver!
